Associate in IT Support

An Associate of Arts (AA) in Information Technology (IT)- Technology Support not only allows the student to complete their general study requirements, but also offers the student to lower division courses that will prepare them for becoming an IT. Students can expect to take courses dealing with programming, business ethics, information systems, technology, and web page design. These classes will prepare the student to enter the IT industry in an entry-level position once the requirements for their AA have been completed. Like most AA degrees, perhaps the most beneficial aspect it offers is the background it gives the student for future studies. With an AA in Information Technology- Technology Support, students will be well prepared to continue their education with a bachelor in a similar area and beyond. With a bachelor or combination of AA and experience, graduates generally possess the credentials required to work for an IT company or to be the IT assistance in business offices.This major will prepare you for:With an AA in Information Technology- Technology Support most students will have sufficient schooling for an entry-level position working on a variety of IT and systems programming issues for many companies. Like almost all other AA degrees, the student will be even better suited to enter the workforce with a bachelor degree or higher. The AA in Technology Support lays the groundwork that will make a bachelor degree in a similar field much easier for the student to accomplish. By the end of their AA students should expect to understand the basics of computer networking, web design, business administration, and systems programming, as well as being able to address and fix a variety of technology and networking issues faced in modern offices around the world.
